Attention: Mr. Roland Dove

Dear Mr. Dove:

Re: Kendallville Iron & Metal  
Sanitary Landfill

Following a discussion at the site of the above proposed sanitary landfill with the two representatives from your office, it was deemed best to change the method of operation for the sanitary landfill from one of a trench method to that of an area method.

We accordingly enclose herein an amendment to our original proposal changing the method of operation to that of area method. I trust that you are now in a position to process this matter; and if you wish additional information, please advise.

We are quite anxious to make some progress concerning this, as we will probably be required to have some zoning changes. We would, therefore, appreciate your early consideration of this plan as amended.

Sincerely yours,

EMERICK & DIGGINS
